Hiring Manager

Human Resources

Your Company

Toronto, ON, Canada

Dear Hiring Manager:

My name is Henry Nguyen. I am an aspiring Front-End Developer.

As a person who is focused on customer satisfaction, I would help manage all aspects of web development from ¾ concept to requirements definition, design, development, launch, maintenance and user support. I enjoy working closely with team members to produce high-quality projects that can

- Web development using HTML5, CSS3, JavaScript, React.js, Bootstrap, WordPress Design

- Translation of wireframes and rapid prototyping tools to accurate, working code

- UX and UI design projects improving load time, site stickiness and user engagement

- SEO initiatives elevating rankings on Google and other search engines to top 10 results

Other than being a self-taught developer, I also bring much more value and other skills that would complement your team. Having previous management skills, and an outstanding length of service history. I believe these skills will come into very good use in the future as I grow and learn more about this new industry and career I am pursuing.

Although I have no work related experience yet as a developer. Please take a look at my portfolio, where you can download a copy of my resume and also view more projects I built.
